Get the Best of Both Worlds: More Thrust, Less Noise with Raisbeck's Advanced Structural Composite 5-Blade Swept Propeller for Your King Air 350

Noticeably quieter, Raisbeck's Swept Blade Technology optimizes airfoil efficiency allowing a larger diameter propeller with less blade tip noise.

Additional Benefits

- Increased takeoff acceleration
- Better landing deceleration and accel-stop
- Improved single-engine climb
- Higher cruise speeds
- Unlimited blade life
- Reduced maintenance costs with 6 years/4000 hours TBO
- 47 pounds total weight savings versus OEM props
- 3 Year/3000 Hour Warranty
- Carbon fiber composite construction to the core

Experience the Power of 5
